Benefits

Always keep your "setup file" up to date
Nubitus automatically receives data from the office

Avoid losing your data
Nubitus immediately sends data to a secured server

Stop losing time at managing files
No laptop required to send data to your office

Avoid losing time searching for files
Nubitus allows to search files based on a GPS location

Start analyzing at the office while you are inspecting
Nubitus automatically sends data in real time

Avoid bad inspection file made with obsolete configuration
Nubitus sends and receives settings or inspection data

Let your instrument step in the connected 4.0 industry
Nubitus works with any instrument with a USB port

Do not be forced to buy a proprietary cloud solution
Nubitus works with the server of your choice

Nubitus

is a connected tool which **automates NDT file management** on any inspection instrument equipped with a USB port. Easy to use, the Nubitus **receives updated configurations** from your office and transfers **acquired data automatically** on your own private server or cloud solution without any manipulation. (**Compression encryption** and **GPS tagging options**)

Compatible with
